

North Tyneside Council

Reference: FOI3533

**Request:**

**1) Please confirm cycle infrastructure plans**

North Tyneside Council has a Cycling Strategy 2018-32 which includes a 'tube map' showing the strategic cycle routes we are developing for North Tyneside.

The Cycling Strategy is available online

here: <https://my.northtyneside.gov.uk/sites/default/files/web-page-related-files/North%20Tyneside%20Cycling%20Strategy.pdf>

NTC, working in partnership with Capita, has been instructed to draft a LCWIP (local cycling and walking infrastructure plan) which utilises and builds upon the identified strategic cycle routes contained within the Cycling Strategy (see above).

Once approved Capita will develop a prioritised programme of cycle route infrastructure improvements for future investment, this can then be used to bid for subsequent government funding opportunities.

**2) Please confirm if there is an approved supplier list / tender list I would be interested in any other relevant information held by your organisation regarding this request.**

No information held - there is no current supplier list for specialist cycling infrastructure.
