

**Request:**

1. Please provide the latest available school forecasts for this education authority, showing the number of pupils in each year group at each school (or for their respective school planning areas if individual school forecasts are not available), these are likely to be the forecasts which were prepared by this education authority in the summer of 2021.

**Please see attached file '*FOI 4301 5 yrs projections*'.**

**This is based on the Jan 21 census update to the model and does not include the impact of housing**

2. Please provide the latest available Number on Roll (NOR) data from the Autumn 2021 School Census when it becomes available, showing the number of pupils in each year group at each school.

**Information not held. The Autumn Census took place on Thursday 7 October, however, the data will not be available until December 2021.**

3. Please provide school places allocation data for 2020 and 2021 showing:  
(a) how many places were allocated each year at each school to out of catchment/out of area children (detailing from which other schools' catchment areas):

**Please see the [Essential Guide To Schools](#) on our website. NB: The figures recorded for siblings and distance will provide the out of catchment total.**

(b) how many places were allocated each year at each school to children living outside this education authority's area (indicating which area outside of this education authority's area they were living in when applying for a place).

**Information not held. Data is not recorded in a format that allows us to retrieve this information.**

**In order to answer this question, we would need to manually check the individual records for every child at every school who was awarded a place under the distance or sibling criteria which would exceed the appropriate limit.**

4. Please provide copies of any feasibility studies undertaken since January 2020 to add capacity at any of these schools (whether this capacity has been added or not); please confirm how many school places these schools will have as a result and when these places will be available; and please confirm the capacity details of any new schools to be opened in this education authority's area within the next 5 years.

**None. The current [Education Impact Assessment](#) which forms part of the [Local Plan](#) assesses the likely future demand for School places across the Borough. This document is scheduled to be reviewed in 2022.**
