

Reference: EIR-777

Request:

What measures does the council have in place to promote sustainability and reduce carbon emissions, and what progress has been made towards achieving these goals?

Response:

This information is readily available on the Council's website.

The homepage of North Tyneside Council's website includes a link to the Authority's Climate Change Hub, which sets out what the Authority is doing to promote sustainability and reduce carbon emissions within the organisation and across the borough, as well as the progress that has been made against achieving these goals: [Action on climate change | North Tyneside Council](#)

This includes the [Carbon Net-Zero 2030 Action Plan](#), which outlines 150 individual actions that the Authority is undertaking to work towards reaching the target to be carbon net-zero by 2030. This Action Plan was published in August 2022 and progress is assessed and the Action Plan updated on an annual basis.
