

Reference: EIR-819

**Request:**

Re. Telecom Communications masts in general in the Council's area. Please supply the following information:

1. The ICNIRP certificates issued for 5G masts in the Council's area.
2. The power output of each antenna in dbm or Watts for each 5G mast in the Council's area and the power intensity drop off calculations supplied by the applicants for any 5G beams emitted from such antennae, since 5G beams do not obey the inverse square law.
3. A copy of the section of the Council's public liability insurance policy showing indemnity cover for any potential personal injury claims which might be brought to the Council in relation to harm caused by wireless pulsed microwave radiation from this 5G technology; it is alleged that a USA telecom company is making provision for such claims in its statutory accounts and wireless technology has the same technical signature worldwide. For example, a 5G technical parameter is beam-forming.
4. The Environmental Impact Assessments conducted by the Council for 5G masts.

**Response:**

1. When an application for a mast is submitted the applicant has to submit ICNIRP certificates and these are uploaded to the application documents on our Public Access website so this is public information for each application submitted for a mast. Link to Public Access: <https://my.northtyneside.gov.uk/category/1079/search-planning-applications>

The information supplied to you is owned by the council unless otherwise stated and may be protected by copyright. You are free to use it for your own purposes, including any non-commercial research or for the purposes of news reporting. Any other re-use of a commercial nature will require the permission of the Council. Further enquiries in this respect should be directed to Head of Law and Governance, North Tyneside Council, Quadrant The Silver Link North, Cobalt Business Park, North Tyneside, NE27 0BY

## Reference: EIR-819

2. All the of the information that has been requested would be public information on each planning application. This can be accessed via the following link: Link to Public  
Access: <https://my.northtyneside.gov.uk/category/1079/search-planning-applications>
3. The Council Insurance cover does not specifically refer to 5G masks/microwave radiation, however it is not an exclusion under the policy wording. The Council holds public liability cover in relation to all activities that it is involved in. Should any claim arise in relation to 5G masts, it would be investigated to determine any legal liability the Council may owe, and/or any negligence that might exist, (in the same way any other claim would be considered). Our current limit of liability in relation to Public Liability cover is £30M.
4. There is no requirement for Councils to carry out EIA's for masts.
