

Reference: FOI-152

Request:

Can I request the source speed data for the most recent speed survey carried out on PARK VIEW, WHITLEY BAY please?

- Please confirm the measuring device type used for this survey.
- Could you confirm the precise location/locations where the survey was carried out?
- If there were multiple locations used, please provide separate the data for each location.
- Please provide the date & time range for each study.
- If there were multiple locations, please provide separate the data for each location.
- Please provide the data in Excel or csv form if possible.
- If possible, please provide the data in individual readings.
- If the data must be summarised, please provide the time range time and min/max/average speeds seen.

Just to confirm location requested, I have provided a shop address on the street: Nord Bottle Shop, 167 Park View, Whitley Bay NE26 3RF

Response:

Attached is a copy of the most recent survey carried out on Park View, Whitley Bay, NE26 3RF.

This was a radar speed survey.

The survey was undertaken at the following grid coordinates: 435194, 572178 from 12/11/2018 - 19/11/2018.

The survey groups the recorded vehicle speed into a bracket rather than recording individual figures. The 7 day summary showed an average speed of 21.5mph in a southbound direction and 20.2 northbound.

The highest recorded speed was in the 46-51mph bracket with the lowest in the 6-11mph bracket.
