

Reference: FOI0078

Request:

1. In the delivery of residential and nursing care do you have a list of the standard/ specialist equipment that should be provided in residential and nursing care settings by the care home provider? If so, please share this list splitting it into residential and nursing and which items of equipment you deem standard and specialist.

Please see attached document.

2. In meeting individual assessed needs of those in residential/ nursing care, is there loaned equipment that is provided through a prescription to meet need via your community equipment service? If so, please share this list of equipment

There is no prescription service (as per the retail model), equipment is accessed via an assessment of need conducted by a relevant professional.

3. In meeting individual assessed needs of those in residential/ nursing care, are there any other organisations/ providers providing equipment? if so, can you please list the organisation and the equipment provided for each.

Each care home will have its own supplier of equipment and community equipment is provided via our Joint Loan Equipment Service.**
