

Reference: FOI2631

Request:

1. The number (and approximate length in kilometres) of cycle lanes which have been created, and which are planned to be created, to facilitate greater active travel in response to the Covid-19 epidemic in your Local Authority or Region.

Under EATF tranche 1 we created 4km of temporary two-way cycle lanes. Under EATF tranche 2 we are seeking to create a further 10km of permanent cycle lanes.

2. The number of roads (and approximate length in kilometres) of roads, which have been and are planned to be closed or partially closed to traffic in response to the Covid-19 epidemic in your Local Authority or Region.

One road is being considered for a partial closure (bus gate)

3. Any other measures your authority is taking to enhance active travel and reduce car use in the wake of the Covid-19 epidemic.

We are rolling out a subsidised electric bike leasing scheme to residents from LSEGs with limited car ownership and compromised public transport provision due to COVID-19.

4. The budget earmarked to enhance active travel and reduce car use in the wake of the Covid-19 epidemic.

We have received £427,489 from EATF tranche 1 and are seeking a further £1.75M from tranche 2.
