

North Tyneside Council

Reference: RFI 1803066

Request:

I would like to request:

1. The total amount spent since June 2017 by the council on interim fire safety measures in high-rise residential buildings over 18 metres that are owned by the council, and have been confirmed to have Aluminium Composite Material (ACM) cladding, in conjunction with other elements of the cladding system that do not meet the relevant requirements of the Building Regulations guidance (abbreviated below as 'these buildings')
2. The total amount spent on interim fire safety measures for these buildings in the most recent month where data is available

If the council does not hold the specific information described at Question 1 or 2, I respectfully request that the council provides any information it does hold from which these figures may be calculated. This could include any one database, spreadsheet or word document holding data relating to the interim fire safety measures put in place on affected residential buildings that the council owns, and the amount spent on interim fire safety measures since June 2017. Please share this excluding any information which could be considered personal information under the Data Protection Act.

North Tyneside Council does not have any high rise residential buildings.

The information supplied to you is owned by the council unless otherwise stated and may be protected by copyright. You are free to use it for your own purposes, including any non-commercial research or for the purposes of news reporting. Any other re-use of a commercial nature will require the permission of the Council. Further enquiries in this respect should be directed to Head of Law and Governance, North Tyneside Council, Quadrant The Silver Link North, Cobalt Business Park, North Tyneside, NE27 0BY

Date: 11/04/2018
