Request:

- 1) The number of potholes identified in the local authority.

All reported enquiries regarding defects within the carriageway are recorded on our Symology electronic data system, however, the system does not allow me to separate which ones relate solely to potholes and which are for other issues such as requests for surfacing works, therefore, I am unable to provide the figures for how many individual potholes were reported to highways. I can, however, identify how many reports we received for defects in the carriageway which resulted in an inspection.

509 No. carriageway enquiries reported to the council during 2017

1056 No. carriageway enquiries reported to the council during 2016

811 No. carriageway enquiries reported to the council during 2015

Number of potholes repaired within 2017 = 6611

Number of potholes repaired within 2016 = 8202

Number of potholes repaired within 2015 = 7335

- 2) The number of potholes identified by the local authority that were not filled during the given year. The time range I am interested in is for each of the three years 2015, 2016, 2017.

All identified potholes were repaired within each of the requested years
