

# Metal Kissing Gates

Specifications:

- Typical distance between clashing posts 1400mm
- Typical radius of curved frame 830mm
- Gate width 1200mm

There are various sizes of the above; most designs are stock proof and inhibit motorcycle use in both directions, however larger gates allow pushchair / wheelchair access.

Pedestrian only designs take up approximately 2m in fencelines whilst larger versions suitable for wheelchair access take up approximately 2.6m within a fenceline.
