North Tyneside Council Report to Director of Regeneration and Economic Development

Date: 8th May 2025

Title: Traffic Regulation Order – Waiting Restrictions – Cromwell Terrace, North Shields

Report by: Nick Saunders, Senior Traffic Engineer

Report to: John Sparkes, Director of

Regeneration and Economic

Development

Wards affected: Preston with Preston Grange

PART 1

1.1 Executive Summary:

This report seeks agreement from the Director of Regeneration and Economic Development to advertise and, in the event that no objections are received, make a Traffic Regulation Order (TRO) to introduce 'no waiting at any time' (double yellow line) restrictions on rear Cromwell Terrace, North Shields.

1.2 Recommendation(s):

It is recommended that the Director of Regeneration and Economic Development agrees

- (1) that notices for the proposal set out in this report should be prepared and advertised in line with relevant legislative requirements;
- (2) that in the event that no objections are received following the period of consultation required by statute, that the circumstances do not warrant the holding of a Public Inquiry; and

(3)that if no objections are received following the period of consultation required by law, the Traffic Regulation Order shall be made.

1.3 Forward Plan:

Seeking delegated decisions to advertise and, in the event that no objections are received, to make Traffic Regulation Orders is a standing item on the Forward Plan.

1.4 Council Plan and Policy Framework

The proposals in this report relate to the following priority in Our North Tyneside, the Council Plan 2021 to 2025:

- A secure North Tyneside
 - We will continue to invest £2m per year in fixing our roads and pavements.

1.5 Information:

1.5.1 <u>Background</u>

The proposal to introduce parking restrictions on rear Cromwell Terrace was developed to address concerns from residents regarding obstructive parking restricting access to the rear lane.

The proposal was amended due to feedback received during informal consultation with residents in the area. This involved the extent of the proposed double yellow lines being reduced to allow residents to park to the rear of their properties where the carriageway is sufficiently wide to accommodate this.

The Authority has undertaken parking assessments in accordance with Annex 6 of the North Tyneside Parking Strategy. These assessments were undertaken in 2023 and identified that obstructive parking was taking place at the above location.

This proposal necessitates variations to the waiting and loading restrictions contained in existing Traffic Regulation Orders (TROs).

1.5.2 <u>Proposal in relation to waiting restrictions</u>

It is proposed to implement 'no waiting at any time' restrictions (double yellow lines) at the entrance to the rear lane as set out on the plan at Appendix 1 to this report.

It is anticipated that the proposed introduction of waiting restrictions will improve vehicle and pedestrian access to the rear lane for residents.

1.5.3 Consultation

Ward members were updated on the proposal by email and residents directly affected by the proposed restrictions were consulted by letter in January 2025. As a result of feedback received from residents, the proposal was amended and another consultation exercise carried out in February 2025. No concerns were raised about the amended proposal.

1.5.4 Proposed next steps

Proposals that restrict traffic movements are subject to due legal process as described in section 2.2 of this report: this includes the Authority giving public notice of the proposals and taking such other steps as it may consider appropriate for ensuring adequate publicity. In North Tyneside, this includes notices advertising proposals being displayed on affected streets and on the Authority's website. This enables members of the public or businesses to object to the proposals and the proposed making of a TRO and/or varying of existing TROs. Any objectors are sent a response and invited to reconsider their objection. Any objections not withdrawn are referred to the Cabinet Member for Environment for consideration in accordance with the Mayor's Scheme of Delegation.

1.6 Decision options:

The following decision options are available for consideration by the Director of Regeneration and Economic Development:

Option 1

To approve the recommendations as set out in paragraph 1.2 above.

Option 2

Not to approve the recommendations as set out in paragraph 1.2 above.

Option 1 is the recommended option.

1.7 Reasons for recommended option:

Option 1 is recommended for the following reasons:

The proposal will discourage obstructive parking thereby improving vehicle and pedestrian access to residential properties.

1.8 Appendices:

1.10 Background information:

- (1) North Tyneside Transport Strategy
- (2) North Tyneside Parking Strategy
- (3) Road Traffic Regulation Act 1984
- (4) <u>Local Authorities' Traffic Orders Regulations 1996</u>

PART 2 – COMPLIANCE WITH PRINCIPLES OF DECISION MAKING

2.1 Finance and other resources

Funding to advertise and implement the proposal is available from the 2025/26 (Parking Management) Local Transport Plan capital budget.

2.2 Legal

Proposals that involve revocations or amendments to existing TROs and any new such orders are subject to statutory legal process set out in the Road Traffic Regulation Act 1984 and the Regulations that flow from that Act, namely, the Local Authorities' Traffic Orders (Procedure) (England and Wales) Regulations 1996. Details are formally advertised, including a 21-day period for objections. Before making a TRO the Authority must consider all objections made and not withdrawn, and can decide whether to make the TRO unchanged, to make the TRO with modifications or not to proceed with making the TRO.

The Authority is required to publish at least one notice detailing the proposals to vary traffic movement and/or waiting and loading restrictions in a local newspaper in addition to taking such other steps as it deems appropriate for ensuring adequate publicity is provided. The Authority is also required to make documents relating to the proposal available for public inspection. In North Tyneside, in addition to being advertised in a local newspaper, notices advertising the proposal are displayed on the Authority's website and on roads affected by the order. Documents relating to the proposal are also available for public inspection at the Authority's offices at Quadrant. Objections to the proposal may be made within a period of 21 days starting from the date the notice was published.

In accordance with the Mayor's Scheme of Delegation, if any objections cannot be resolved, then the Cabinet Member for Environment is asked to consider any objections made and not withdrawn and to determine if a TRO should be made.

Within 14 days of the making of the proposed TRO varying the existing TRO in respect of the proposals set out in the report, the Authority must notify any objectors, publish a notice of making in a local newspaper and take such other steps as it deems appropriate for ensuring adequate publicity is given to the making of the TRO. In North Tyneside, in addition to being advertised in a local newspaper, notices of making are displayed on the Authority's website and on roads affected by the TRO. Documents relating to the order are also available for public inspection at the Authority's offices at Quadrant.

2.3 Consultation/community engagement

2.3.1 Internal consultation

Ward members' views on the proposal were sought as described in section 1.5.3.

2.3.2 Community engagement

Views on the proposal were sought as described in section 1.5.3. The proposal is to be advertised in line with statutory process as set out in section 1.5.4.

2.4 Human rights

Any human rights implications must be balanced against the duty that the Authority has to provide a safe highway for people to use. It is not considered that the proposed restrictions will have a negative impact on individuals' human rights.

2.5 Equalities and diversity

An Equality Impact Assessment for waiting restrictions has been undertaken and is attached as Appendix 2 to this report. This identifies positive potential impacts: these relate to improved accessibility for people who currently experience difficultly negotiating footways and crossing the road. Actions are specified to reduce the potential negative impact relating to access arrangements during construction work.

2.6 Risk management

There are no risk management implications arising directly from this report. Strategic and operational risks associated with transport matters are assessed via the established corporate process.

2.7 Crime and disorder

There are no crime and disorder implications directly arising from this report.

2.8 Environment and sustainability

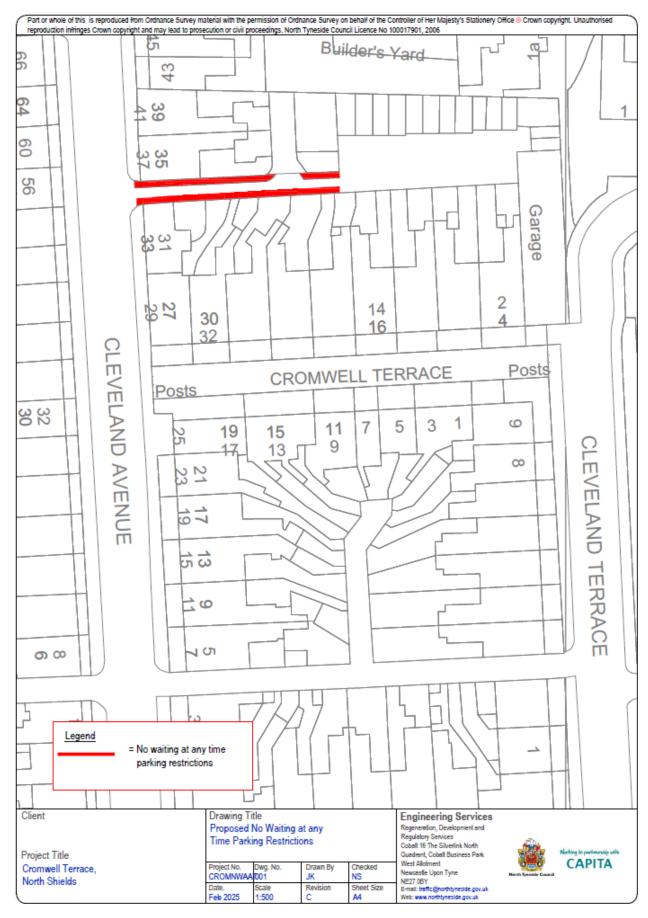

There are potential positive implications in that by contributing to a reduction in obstructive on-street parking, the proposals support the use of more sustainable modes of transport in preference to car use.

3. Evidence gathering and engagement				
Internal evidence External evidence				

What evidence has been used for this assessment?	Relevant objectives of the Authority, e.g. improve the street network, putting cycling and walking first (North Tyneside Transport Strategy); promote road safety alongside healthy travel (North Tyneside Travel Safety Strategy); and effectively manage demand for parking North Tyneside Parking Strategy. Responses to initial resident and stakeholder consultation completed by the team.		
Have you carried out any engagement in relation to this activity?	yes		
If yes of what kind and with whom? If no, why not? Is there any information you don't have?	Consultation with local varieties, local business necessary.		
If yes, why is this information not available?	Views of the wider public on the detailed notices/orders relating to the scheme – we will understand this by advertising the notices/orders following this report. Copies of the orders are printed and placed on site alongside being published in a local newspaper and on the North Tyneside Council website. Each notice gives detail on how the public can		

request information in other languages and
formats.

4. Impact on groups with different characteristics					
	Potential	Potential	Description of the potential impact		
Legally	positive	negative	and evidence used in the		
protected	impact	impact	assessment (mitigations are not		
characteristics	identified	identified	included here)		
Age	yes	yes	People for whom age makes negotiating footways and crossing the road more difficult may experience a positive impact from a reduction in obstructive junction and pavement parking.		
			They may also experience a negative impact from a restriction on parking on the proposed waiting restrictions. However, we will always ensure there is alternative long stay parking available to all vehicles at nearby locations.		
Disability	yes	yes	Footway users with a disability (e.g. wheelchair users and visually or audio impaired people) may experience a positive impact from a reduction in obstructive junction and pavement parking. People with a disability who hold a Blue Badge are permitted to park on the proposed single yellow lines for up to 3 hours. However, we will always ensure there is alternative long stay.		
			ensure there is alternative long stay parking available to all vehicles at nearby locations. Temporary traffic management arrangements during construction have potential to have a negative		

			impact on accessibility for people with a disability. This can be reduced by seeking to ensure that construction partners do not obstruct		
			footways which remain open, and in		
			the case of closures provide		
			appropriate access arrangements		
			such as temporary dropped kerbs		
Gender	no	no	and/or safe temporary walking areas.		
reassignment	no	no
